

Bio-based functional fluids

CFL Technologies AB
Götlundagatan 3
12471 Bandhagen
Sweden

CFL Technologies AB closes the first of four planned capitalization rounds of 4 million SEK at an evaluation of 16.5 million SEK. The round was oversubscribed.

The company executives Erik Josephsson (CEO) and Per Wiklund (Founder) thank the investors for their confidence in us and our business plan.

CFL Technologies AB has an ambitious plan to grow the business both regionally and globally. Sales in Sweden is growing, and we plan to get our own production online Q1 2022 and simultaneously introduce our first products to the rest of Europe. Presence in North America is planned for late next year, followed by Asia in 2023.

CFL Technologies AB is a company focusing exclusively on bio-based high performance functional fluids for the construction-, manufacturing-, process-, and lubricant industries. Our products are also biodegradable and non-toxic and can contribute to less climate impact of many industrial activities.
